INTRODUCTION

This Framework has been developed by multi-agency partners of the Suffolk Safeguarding Adults Board in consultation with a number of organisations across Suffolk. It was developed in response to the 2017 Independent Review of Safeguarding Adults and aims to assist practitioners and their organisations with a common understanding of the indicators of abuse. This Framework should read in conjunction with your own organisations Safeguarding Adults policies and procedures and will help inform a more consistent terminology and response to safeguarding adults in Suffolk.

The Framework will help identify the abuse type and what, if any, interventions are required and can be used at time time. However practitioners should always use their knowledge, skills and professional judgement in deciding what actions to take. The decision making process must always be recorded in the persons notes or records, even if no intervention has occurred. Individual cases may not sit within one specific abuse type, or one category, practitioners will need to ensure that they have a full understanding of the situation to inform their decision making process and identify the support or interventions required.

The Suffolk Safeguarding Adults Framework format is based on the Oxford thresholds document and utilises the health thresholds guidance and health safeguarding thresholds triangle from the NHS Best Practice Guidance. It compliments existing guidance from Social Care in Excellence (SCIE), the Royal College of General Practitioners and has been developed in line with the safeguarding requirements set out in the Care Act 2014.

LOCAL MANAGEMENT

Resolutions can be sought by individuals, their representatives or organisations themselves without the need to refer to Customer First or Safeguarding Leads.

QUALITY CONCERNS

These are concerns that have been raised with regards to the quality of the care being delivered either by formal or informal carers and will require a response such as care management review, complaint raised or referral to other agencies but is not considered abuse that requires a specialist safeguarding response.

REQUIRES CONSULTATION

These are concerns raised that dependent on the context and case specific details may require reporting for a specialist safeguarding response or may be able to be managed via local management or quality concern response. Therefore these concerns will require discussion and consultation with a safeguarding lead or MASH consultation line.

REPORTABLE SAFEGUARDING CONCERN

These are incidents of abuse that are criminal or result in serious harm and require a specialist safeguarding response. This may result in a police lead response and/or a safeguarding enquiry under Section 42 of the Care Act. It is important to note that if the person is in any immediate danger the police must be contacted on 999 straight away.

USING THE FRAMEWORK

The Framework is designed to ensure adults at risk can access the right support at the right time and responses to concerns are appropriate and proportionate.

The following three stage test will be applied,

Has a need for care and support (whether or not the Local Authority is meeting any of those needs)* AND

Reasonable cause to suspect there is a risk of, or experiencing abuse and/or neglect AND

As a result of those care and support needs is unable to protect themselves from either the risk or experience of abuse or neglect

**Suffolk
Safeguarding Adults Board**

An adult who meets the above criteria is referred to as an "adult at risk".

However practitioners need to be mindful that safeguarding duties apply to family carers experiencing intentional or unintentional harm from the adult they are supporting or from professionals and organisations they are in contact with. As well as victims of domestic abuse or modern slavery who are

* - In some situations the Local Authority can undertake enquiries for those that only have support needs
